Installing USB Device Drivers

Add New Hardware Wizard

What do you want Windows to do?

○ Search for the best driver for your device. (Recommended).

○ Display a list of all the drivers in a specific location, so you can select the driver you want.
[< Back] [Next >] [Cancel]

The USB drivers can interface with Windows 98, 2000, or ME.

System files are needed when loading the USB drivers. These files may already be on your PC or you may be required to load them from the Microsoft CD that came with your PC.

1 Check that the USB cable is connected from the PC to the cable modem. If it has not been installed, refer to, "Installation For a Single User."

2 Insert the CD into the CD drive. The PC automatically recognizes the USB connection.
